Professional Summary

Full-stack software engineer with hands-on experience building and scaling Stripe-integrated payment systems, from customer-facing checkout and billing surfaces to multi-currency monetization infrastructure. Proven track record shipping revenue-driving features in React, Next.js, and Go, with direct ownership of pricing, invoicing, and payment-gateway logic across production platforms.

Professional Experience

Full-Stack Software Engineer | CFO — Cookeville, Tennessee
SEO Gets — Sep 2025 – Current

- Contributed to 52% revenue growth by reshaping the platform's checkout flow and Stripe integration, adding coupon support and redesigning the pricing-tier upgrade page to reduce friction in the paid conversion path.
- Expanded the Stripe billing surface end-to-end, shipping customer-facing invoice listing and payment receipt views sourced directly from Stripe's API.
- Owned the subscription monetization funnel: built the annual-upgrade flow, an enterprise "book a call" upsell path, and plan-recommendation logic.
- Contributed to a React-to-Go build pipeline and resolved API integration issues (payload limits, duplicate-call bugs), transferable to Stripe API client and webhook reliability work.
- Served as CFO, acting as the primary liaison between the CEO and external financial stakeholders like the bookkeeper and accountant, aligning technical billing decisions (pricing tiers, coupon logic, invoicing) with company-wide financial reporting and reconciliation.

Full-Stack Software Engineer — *Remote*
DM - Financial Data Processing — Jan 2022 – Aug 2023

- Built the front-end of a buy-now-pay-later platform enabling merchants to offer financed checkout to more than 2,000 customers, using React and Go, a model directly relevant to multi-party and partner-facing payment systems.
- Reduced client onboarding time by 80% by building the front-end of automated onboarding flows and simplifying registration.
- Accelerated intern development across full-stack and business domains by designing a structured two-year learning plan focused on software engineering fundamentals and communication skills.

Military Pilot – T-25 Universal — Brazil
Brazilian Air Force Academy — Jan 2019 – Jul 2021

- Learned how to multitask effectively under high pressure with exceptional records, acing 85% of the missions.
- Military discipline and leadership accolades for five consecutive years.

Education

B.S. in Computer Science, Minor: Mathematics – Cum Laude | in Cursu Honorum
Tennessee Technological University

Scholarships: Generation Google Scholarship 2024, Honors Academic Scholarship, and Engineering Council Scholarship

Independent Ventures

Sphera Academy - Co-Founded, paid client work for USTAY Immigration — May 2023 - Dec 2023

- Built a full-stack e-learning platform with Next.js featuring sub-second video playback across 5,000+ courses, integrated Stripe payments and paywall supporting 135+ currencies, and implemented a custom CMS architecture using Strapi and PostgreSQL.
- Designed, architected, and shipped a fully functional e-learning platform end-to-end in 6 months using JavaScript.

Skills

Fundamentals and Practices: Data Structures, Algorithms, Object-Oriented Design, Scrum, Test-Driven Development, Spec-Driven Development, Stripe API, Webhooks, Subscriptions/Billing, Idempotency.
Architecture & Systems: Distributed Systems, RESTful APIs, CI/CD (GitHub Actions), Cloud Deployments, GCP, AWS.
Programming Languages & Frameworks: Go, React, JavaScript, TypeScript, Next.js, Node.js, and Python.
Databases: PostgreSQL, MongoDB.
